EXPERIENCE

TATA CONSULTANCY SERVICES (TCS)

ASSISTANT SYSTEM ENGINEER
April 2021 - Present | Delhi, India

- Engineered modern **SPA**, cross-browser compatible web pages using **React.js** and other web technologies.
- Collaborated closely with Backend and Design teams to translate wireframes into code using **Agile** and **Scrum** methodologies.
- Built reusable and scalable components. Responsible for optimizing and fixing bugs in the codebase for better user experience.

ZEICHNEN SERVICES

WEB DEVELOPER - INTERN
Aug 2020 - Sep 2020 | Delhi, India

- Involved in designing of **eCommerce** website for students to buy and sell products online. Fixed significant **bugs** and **errors**, under the guidance of senior developers.
- Acquired hands-on experience building dynamic website using **HTML**, **CSS**, **JavaScript** and applying Media Queries for responsive design.

PROJECTS

WHATSAPP CLONE   Link => Repo :: Deployed

Stack Used: React JS, Firebase, SCSS

- WhatsApp Web clone developed using React JS. Enabled real-time messaging that allows users to share text and images over chat.
- Integrated **Firebase** services for authentication, database, and backend.

NEWSJUNKY   Link => Repo :: Deployed

Stack Used: React JS, API, HTML, CSS, Bootstrap

- Designed and developed a News App that fetches news from various **National & International** sources and presents it in a concise format.
- Integrated **NY Times API**, which allows to search for new or old articles dating back to **1851**.
- Dedicated search feature allows users to search for topics as per interest & provide endless results with **Infinite scroll** functionality.

INOTEBOOK   Link => Repo :: Deployed

Stack Used: ReactJS, NodeJS, ExpressJS, MongoDB, Bootstrap

- Built a **MERN** stack cloud Notes App with Create, Read, Update and Delete **(CRUD)** Operations.
- Implemented user **Login / Signup** functionality using **JWT** and **bcrypt** libraries.
- Deployed using: **Cyclic, Netlify** and **MongoDB Atlas**.
