SKILLS

Languages: JavaScript, Java
Web Development: ReactJS, Redux, HTML, CSS, Bootstrap
Developer Tools: Git, Figma, VS Code, NPM, REST API

EXPERIENCE

Uplers   Aug 2023 - Present
React Developer   *Remote*

- Built an **AI-driven** interview platform frontend independently, enabling seamless interaction and intuitive user experiences; the platform currently facilitates over **8,000** interviews daily.
- Actively collaborated in the design and development of a **recruitment automation portal**, simplifying the **hiring process** for recruiters.
- Led the frontend development for **AI-based SaaS products**, focusing on solving user problems through intuitive design and streamlined functionality.
- Worked with cross-functional teams to translate business requirements into impactful features, enhancing user experience and optimizing product functionality.
- Maintained clean, reusable code and improved performance through modern best practices and optimization techniques.

Accomplishment: Delivered key projects within defined timelines, receiving commendation for taking charge and execution **three times**.

Tata Consultancy Services (TCS)   April 2021 - Aug 2023
System Engineer   *Delhi, India*

- Successfully migrated an old website to **React.js**, resulting in a modern, cross-browser compatible single-page application (SPA) that increased the overall website footprint by **30%**.
- Collaborated with Backend and Design teams, using **Agile** and **Scrum** methodologies to translate wireframes into functional and optimized code.
- Built reusable and scalable components. Identified and resolved issues and bugs in the codebase, resulting in improved system performance and user experience.

Accomplishment: Received On-the-Spot Award for excellent teamwork and collaboration **two times**.

Zeichnen Services   Aug 2020 - Sep 2020
Web Developer - Intern   *Remote*

- Contributed to design and development of a responsive **eCommerce** website for students to buy and sell products by utilizing HTML, CSS, JavaScript, and other web technologies from scratch.

PROJECTS

WhatsApp Clone | *React JS, Firebase, SCSS*   **Repo** | **Deployed**

- Developed a real-time messaging clone of WhatsApp Web using React.js, enabling users to share text and images over chat.
- Integrated **Firebase** services for authentication, database, and backend, resulting in a highly secure and scalable application.

NewsJunky | *React JS, API, HTML, CSS, Bootstrap*   **Repo** | **Deployed**

- Designed and developed a News App that presents concise news from National & International sources, integrated with **NY Times API** that allows searching of articles dating back to 1851.
- Implemented a search feature with **Infinite Scroll** functionality that enables users to find and browse through topics of interest effortlessly.

iNotebook | *ReactJS, NodeJS, ExpressJS, MongoDB, Bootstrap*   **Repo** | **Deployed**

- Built a cloud-based Notes App with **MERN** stack, implementing full **CRUD** operations.
- Utilized **JWT** and **bcrypt** libraries for secure user login and signup functionality.
- Deployed using: **Cyclic, Netlify** and **MongoDB Atlas**.
